

Open Invitation to
WONDERMAR II Public Workshop No. 2
Exploitable results from maritime EU research projects
Malmö, Sweden
Thursday September 12th, 2002

Dear Colleagues and Partners,

Bremen, July 2002

In the name of the **WONDERMAR II** consortium, the Maritime Development Center of Europe (MDCE) and BALance have the pleasure to invite you to the 2nd **WONDERMAR II** Public Workshop. It will take place in the **Malmö Børs hus, Sweden, on 12th September 2002**. The primary target group are technical innovation managers from the maritime industry. You should be interested either in the take-up of information about technology-based engineering and business solutions or in future European research activities. Participation is free of charge. The workshop will be held in parallel with the ICCAS 2002 conference and is envisaged to complement its programme. A joint session of both events is planned for information exchange.

WONDERMAR II is an open user group in the maritime sector co-ordinating the activities of European projects with a main focus on reviewing the state of the art and identifying new developments in IT support for the maritime industry.

The 2nd **WONDERMAR II** Workshop will present and discuss exploitable and already used results of maritime research projects funded by the European Union. The presentations will describe the objectives of the projects and give an outline of the tools and methods developed. Exploitation strategies will be discussed and possibilities of getting access to the products presented will be explained.

Attached you will find a tentative workshop programme and a registration form. Please complete the registration form and return it before August 30th, or use the registration form on the **WONDERMAR II** internet home page (<http://www.wondermar.net>).

Looking forward to seeing you in Malmö
Kind regards

Joachim Brodda
Project Manager WONDERMAR

Carsten Melchior,
Workshop Host

Maritime Development Center of Europe
